Education

Master of Computer Applications (MCA)

JAIN UNIVERSITY, BANGALORE
2023 – 2025

Bachelor of Science (B.Sc) in Computer Science

CALICUT UNIVERSITY
2019 – 2021

TECHNICAL SKILLS

Frontend Technologies

- HTML, CSS, Tailwind CSS, Bootstrap
- JavaScript
- React JS, Redux
- TypeScript, Next.js, Material UI

Backend

- Python, Django
- Django REST Framework
- FastAPI, Flask
- REST API Development

Databases

SQL, PostgreSQL, Neon Cloud DB

Tools & Platforms

VS Code, Postman, Pg admin

Cloud & Deployment

Vercel, Render, Cloudinary, Cloud VM, Git, GitHub, GitLab

Certification and Training

- Software Developer Internship – Upcode Software Labs

Profile

Software Developer and MCA graduate with hands-on experience building and deploying scalable web applications using React, Python, Django, Flask, PostgreSQL, Node, Next.js, etc... Completed an intensive internship at Upcode Software Labs, delivering production-ready projects across frontend, backend, and cloud deployment. Eager to contribute to a dynamic engineering team and grow into a well-rounded software professional.

Experience

Upcode Software labs-Software developer

- Developed full-stack applications using React, Python, Django, and Flask with PostgreSQL for database design and queries.
 - Built and integrated REST APIs, handling complete frontend-backend communication across multiple projects.
 - Participated in live project development and deployed production applications to cloud platforms.
 - Used Git for version control and collaboration.
 - Built a full-stack CRM application as part of a 3-member team using Next.js (TypeScript), Tailwind CSS, Redux, Django REST Framework, and PostgreSQL, based on Figma designs.
 - Implemented core CRM modules including Leads, Companies, Deals, and Tickets with full CRUD functionality and responsive UI.
 - Developed a shared layout system with a common sidebar and top navigation across all CRM modules, ensuring a consistent and mobile-responsive user experience.

Project Experience

Aurette – Women's Jewellery E-Commerce Platform

Tech Stack-Python Django | Bootstrap 5 | PostgreSQL |
Built a full-stack luxury e-commerce web application with complete shopping functionality including product filtering, live search, cart, checkout, wishlist, user authentication, customer reviews, Arabic/English bilingual support, and mobile-responsive design. Deployed on Vercel with Neon PostgreSQL cloud database.

Additional Strengths

- Full Stack Development (React + Python)
- Modern UI design using Tailwind CSS
- Strong database skills
- Quick learner & problem solver

CRM web application

Tech Stack: Next.js · TypeScript · MUI · Redux · Django REST Framework · PostgreSQL

Built a full-stack CRM application as part of a 3-member team based on Figma designs, featuring a complete business workflow with modules for Leads (notes, emails, calls, tasks, meetings, attachments), Companies, Deals, and Tickets. Implemented a shared responsive layout with a common sidebar and top navigation across all modules, with full CRUD functionality throughout.

Declaration

I hereby declare that the above information is true and correct to the best of my knowledge.
